7. Accessories for Alcatel Mobile 200, 300 & 400 Reflexes

The Alcatel Mobile Reflexes™ range of DECT handsets comes complete with a range of chargers and a series of accessories designed for use in specific operational environments.

■ ■ ■ Charger

Four different chargers are available each according to the needs of the user:

- ✓ **Corded charger:** use the set while it is charging
- ✓ **Basic desktop charger:** neat on the desk for Mobile 100, 200 Reflexes
- ✓ **Dual desktop charger:** Mobile 100, 200, 200 Ex Reflexes set is always on (with spare-battery)
- ✓ **Voice desktop charger:** Mobile 100, 200 Reflexes high quality hands-free mode Wall mounted charger kit

■ ■ ■ Headsets

- ✓ **Express Headset-** A monaural headset intended for office users, which can be mounted as an ear-hook or head-band.
- ✓ **Profile Headset-** A binaural headset aimed at active users wanting a securely fixed headset while communicating on the move or in noisy, telephone intensive environments (e.g. warehouse operators, shop floor supervisors, etc.)
- ✓ **Noise-proof Headset-** A comfortable binaural headset suitable for use in extremely noisy environments (e.g. airports, railway stations, etc.) The headphones are designed to eliminate most external noises.

■ ■ ■ Carrying cases

Each Mobile 200 Ex Reflexes TM is designed for use in harsh or industrial environments characterized by dust (wood or metal), moisture, chemicals or when there is a risk of dropping the unit.

It is additionally equipped with filters and shock absorbing materials to protect the handset from these traumas that would otherwise ruin the unit.

8. Radio base station

The Alcatel-Lucent 9100 Base Station GSM/EDGE offers increased deployment flexibility, better radio performance and highly compact design. The 9100 MB allows service providers to deploy GSM alone or a combination of GSM and UMTS networks together, all in the same cabinet.

■ ■ ■ Indoor base station

Radio coverage from 50 to 300 meters, up to 6 simultaneous calls

■ ■ ■ Outdoor base station

Radio coverage from 50 to 300 meters, up to 6 simultaneous calls

■ ■ ■ Indoor base station Explosion Proof

Radio coverage from 50 to 300 meters, up to 6 simultaneous calls

9. Electronic card & CPU

■ ■ ■ Description

The CPU 5 controls the entire printer server board. The CPU 5 has the function of quadruplicating the frequency of the clock signal input from the clock-frequency control unit 1 and outputting the resultant clock signal (this function can of course be served by a dedicated hardware circuit if desired), and supplies the extended-interface control unit 3 and a LAN controller 8 (to be described below) with the clock signal.

A ROM (read-only memory) 6 stores boot programs of the print server board and control programs for the print server board. A DRAM (dynamic random access memory) 7 is used as a region where a control program from the ROM 6 is developed, or as a data region

3. VERSHOVEN

1. Industrial telephone A24

The weatherproof A24 is suited for dusty and moist environments. It is designed for DTMF and pulse dialling as well as a PABX device and end device. Its keypad consists of 16 durable buttons that can also optionally ordered to light up. A continuously adjustable fixture protects the telephone handset against shocks. An integrated volume amplifier can be added on. We are also happy to offer the A24 with two custom buttons that can be assigned other functions as desired.

2. Industrial telephone A24/VoIP

With the proven casing of the weatherproof telephone A24 combined with newest IP-Network-Technology the A24/VoIP will be the new component for your communication system. The configuration is realized by a simple and clearly arranged webinterface. All hardware combinations of the A24 are also available for the A24/VoIP. The brightness of the optional available lighted keypad is adjustable. As known from our A24 you can also connect the headset WHA to the A24/VoIP.

500 N.E. 191 Street
Miami, FL 33179

3. Custom telephones A24ZB + A24OB/OBL

The weatherproof A24ZB/AL-Basic can be connected to any standard telecommunications equipment. Using the internal programming keyboard, the A24ZB/AL-Basic can be converted into an alarm telephone: The programmed phone number is automatically dialled as soon as the handset is picked up.

The A24OB is used to configure autonomous telephone lines – up to ten separate ones can be connected to one another using the A24OBL. The integrated energy saver mode greatly increases the service life of the battery.

4. Ex-Industrial telephone dA24

The lightweight Ex industrial dA24 telephone is designed for explosion prone areas. It can be used as a PABX device and end device as well as for DTMF or pulse dialling. In the event of loud environmental noise, you have the option of turning on an integrated handset amplifier. A continuously adjustable fixture protects the telephone handset against shocks. The robust 16-part keypad can also be ordered with lighted keys. Upon request, we can also supply the dA24 with two self configurable keys.

The keyless version dA24/ZB is also suitable as an alarm phone.

5. Ex-Headset his for dA24

The iHS headset will keep you in safe contact even in potentially explosive environments. Thanks to the headset's excellent insulation efficiency, you can conduct problem-free conversations even in environments with very high noise levels of up to 115 dB (A). The dynamic microphone perfectly compensates for disruptive external noises. The iHS perfectly complements the dA24 industrial telephone and is suitable for use on offshore platforms and other explosive environments

6. Phone signal Ex-DUO

The phone signal Ex-Duo signals incoming calls from stationary telephones as a secondary ringing device. The signaling is ensured by a 5 joules flash and by a 110 dB(A) sounder. Once an incoming call is signalled, the flash and the sounder will be activated. Between the ringing signals the flash is bridged for continuous flashing. Different sounds can be set individually.

7. Ex telephone connection relay dTA3

The dTA3 telephone connection relays can be used to switch up to two external devices separately with ring tone signals – such as a siren and a flashing light. The bridging of the calling pause can be set for each of the attached devices. Both the dTA3 are designed for permanent use and are suitable in their Ex variation forms for temperatures between -20 °C and +40 °C.
